

Dear Interested Public,

November 3, 2014

Last week we sent you a scoping letter for the 2014 Kensington Fuel Depot project. The letter stated that instead of an appeal period, there will be an objection process before the final decision is made and after the final environmental analysis document and draft decision are mailed (reference 36 CFR 218). In order to be eligible to file an objection, timely, specific written comments related to the project must be submitted during scoping or any other periods public comment is specifically requested on this EA (218.5).

Though we always accept comments, in order to gain status to be eligible to file an objection, your comments for this scoping must be received by December 04, 2014. Please submit comments to [comments-alaska-tongass-juneau@fs.fed.us](mailto:comments-alaska-tongass-juneau@fs.fed.us). By responding to the scoping it will ensure that you will continue to receive the EA and the draft decision document. Thanks you for your interest in this project.
